

# NIRS Consortium

## June 3, 2013 Tour Sign-up Form

We invite you to attend a tour with dairy and sample analysis related topics arranged by the NIRS Consortium. We will leave the main AOAC meeting location at the Kalahari Resort and travel to Madison to visit the University of Wisconsin-Madison Dairy Cattle Center and the US Dairy Forage Research Center.

At the UW Dairy Cattle Center we will observe a demonstration of rumen fluid harvesting and *in situ* techniques. We will see a refurbished Dairy Cattle Center and have opportunity for discussion on herd management, ration, and sample analysis.

At the US Dairy Forage Research Center we will see NIRS equipment used by USDFRC scientists, starch and soluble carbohydrate analyses, *in vitro*, *in situ*, and gas analysis used for various assays, and analyses used to support silage fermentation profile.

**We hope you can join us for this informative tour!**
